

I urge the FCC to continue regulation of internet broadband service so that smaller, independent service providers will be guaranteed access with reasonable pricing. I place a high value on the fact that I have a choice of service providers and am not forced to purchase my internet and DSL access from a large impersonal corporate entity (as I am for other media -- television, radio, news, phone). My locally based, independent ISP strives for customer satisfaction and happiness, with a personal touch at all levels. Do not take the choice and independence from internet consumers!
